TOP LOCAL ACCOUNTING FIRM ANNOUNCES GROUND BREAKING CEREMONY FOR NEW 49,500 SQ. FT. BUILDING IN SPRINGFIELD, MISSOURI

Springfield, MO — KPM CPAs, PC (KPM CPAs) is proud to announce a ground breaking ceremony for their new headquarters, located at 1445 East Republic Road. The event will take place at 4:00 p.m. on Monday, November 25.

“The concept for the new three story office building started more than five years ago to improve efficiencies and allow ourselves adequate room to grow”, stated Jim Lewis, Shareholder, KPM CPAs. We are proud to share the good news with the community and very excited to see this project come to fruition.”

The current office headquarters is centrally located; near the intersection of Sunshine and Glenstone in Springfield. The firm has called this place home for more than 30 years and eventually took over all 19,700 square feet of their current building. The new space will be substantially larger, with the main training room seating up to 120 people. In addition, the building will include many green features and an outdoor eating area.

The firm now has around 65 employees, but following their January 2014 merger with area accounting firm Davis, Lynn & Moots, P.C. (DLM) will employ a staff of nearly 100 personnel. After the merger, the firm will retain the name KPM CPAs.

Randall Moots, managing partner of DLM said, “I will be glad when we can come together under one roof. Our staff is excited about a new building after our nearly 20 year history in our current space.”

The building’s first and second floors, comprised of nearly 34,000 square feet will house staff from KPM CPAs, KPM Technologies and KPM Wealth Advisors. In addition, the third floor has approximately 16,000 more square feet to grow into when needed. Construction began this month and is slated to be completed in the fall of 2014.

About KPM CPAs

KPM CPAs, the area’s second largest accounting firm, was established in 1966 and serves clients in the manufacturing, distribution, financial institution, and auto dealership industries. They are a member of CPA Associates International and have office locations in Springfield and Branson.
