

ACCOUNTING OUTSOURCING

Today's highly competitive environment demands that businesses streamline their operations. More and more companies are turning to outsourcing as a tool to reduce costs, improve productivity, and enhance their ability to compete in the marketplace.

WHY OUTSOURCE YOUR ACCOUNTING?

Cost cutting is an important factor but rarely the only reason to outsource; most choose outsourcing to free time and resources for increased focus on growth.

WHEN SHOULD YOU OUTSOURCE?

- When you are too busy handling operations & are losing focus on your core business
- When you are facing a time, money, or human resource crunch
- When you need to reduce overhead
- When you do not trust anyone with confidential information
- When you cannot find adequate accounting staff

BENEFITS

- Reducing the number of bookkeeping employees, including payroll & benefit expenses
- Reducing the risk of fraud or embezzlement
- Reducing the investment in hardware such as computers, file servers, & accounting software
- Allows staff to focus on core business activities—growing & maintaining the business
- Peace of mind—accounting functions completed by highly skilled individuals

Outsource to:
reduce costs, improve
productivity, & remain
competitive
